AI Acknowledgement

CL_AppliedSession21TeamD

I acknowledge the use of [1] Gemini [2] (https://gemini.google.com/) [3] to add javadoc to my own work. On 22 April 2026 I submitted my entire code for task 2,3,4 that I created with the instruction to “Add Javadoc to each class/interface that I have provided”. [4] The output was then modified further to better represent my own style.

I acknowledge the use of [1] Claude [2] (https://claude.ai/login) [3] to find design alternatives for requirement 3 and 5 as to whether an interface or abstract class is beneficial to meet solid principles for the fleshy/warped tree but also for req 5 state status and state effects. [4] The output was then discussed with the team.
